Alexandria, Virginia 22313-1450

Sir:

The present application is a US national application of International Application No. PCT/GB2004/05313. Attached for the examiner's consideration is a corrected International Preliminary Report on Patentability that was issued on November 17, 2006. Although a prior International Preliminary Report had been issued in the International Application, that report failed to consider the claim amendments that were filed during the International stage. The attached report corresponds to the claims as currently pending in the present application except for the formal amendments which were made in the Preliminary Amendment filed concurrently with the present application.

DATED this 26th day of December 2006.

Respectfully submitted,

/Dana L. Tangren/ Reg. # 37246
